Eniola Akinwale-Akhumere

FRONT-END SOFTWARE ENGINEER

Profile

I am a software and website developer who is proficient at building exceptional, high-quality and result-oriented softwares. Experienced in developing web applications with emphasis on clean scalable code, maintainability, security and performance.

Personal Projects

To-Do App
- An app for to-do lists. It allows users to add new to-do lists, mark to-do's as complete, and delete to-do's.
- Technologies used are: HTML, CSS and JavaScript.

Weather App
- A simple weather app that allows users to get current weather information based on the city you search for.
- Technologies used are: HTML, CSS and JavaScript.

Tic Tac Toe
- A simple tic tac toe game.
- Technologies used are: React.js and Framer Motion.
